RUGGED, HANDHELD FIELD CONTROLLER TO IMPROVE CONSTRUCTION PRODUCTIVITY

Featuring onboard GPS, wireless communications and a digital camera, the TSC3 is the contractor's new information hub.

Rugged, Durable Design

The Trimble TSC3 is water and dust resistant to withstand the toughest weather and jobsite conditions. The controller's display is designed for operation in all light conditions whether at night or in the bright sunshine. And it operates in temperatures ranging from -30 C to +60 C (-22 F to 140F).

Cable-free Operation

The Trimble TSC3 controller is designed to operate with all Trimble Site Positioning Systems, including the SPS882 GNSS Smart Antenna, SPS852 GNSS Modular Receiver, and SPS series total stations. Integrated Bluetooth wireless technology delivers cable-free communication between the TSC3 and Trimble GNSS Receivers. The integrated 2.4GHz radio provides an ergonomic solution to total station measurement, further eliminating components and cables from the rod.

Connectivity

As part of the Trimble Connected Construction Site, the TSC3 comes standard with integrated 3G modem and 802.11 Wi-Fi capability for instant network access wherever a wireless network is available. This integrated connectivity provides the ability to rapidly send and retrieve data and additionally send/receive email without the need for additional components or plug-in cards.

Ideal for grade checkers, site engineers and surveyors
